ClutchCourt Maple Sports Flooring

Sustainability at Tarkett

Sustainability at Tarkett is based on Cradle to Cradle® principles. This approach to design attempts to create a sustainable loop of production, use, and reuse, with minimal environmental effect and optimal product performance in the process. To achieve these goals, Tarkett divides the product life cycle into four groups: good materials, resource stewardship, People-Friendly Spaces, and Reuse and Recycle. The ways in which Flexlock embodies these individual goals are outlined here.

- Made from natural materials

- Selective harvesting forest management
- Harvested with timber replacement program

- Low VOC finishes, sealers, and paints

- Maple flooring can be repurposed or reused
